

Smartly Automate a Wide Array of Your Cumbersome Accounting Processes with Accounting iBoT from Perpetuuti's Plug-and-Play iBoT Store

Enhance Service Levels.
Boost Productivity.
Save Costs.

What does the Accounting iBoT do?

Most organizations still have a lot of routine processes that use employees to manually manipulate structured and unstructured data. The reason these processes have escaped automation until now is a mélange of traditional practices, cost of integration of systems and lack of organizational discipline around multiple process variations...The good news is Perpetuuti's Accounting iBoT can smartly eliminate manual tasks to streamline workflows, improve compliance and reduce costs.

The Accounting iBoT operates just like a human would: it logs into a system, extracts information from various accounting applications, manipulates and reconciles structured data, performs calculations, fills in forms, communicates with other systems and logs out. It also generates invoices and can dispatch them through mails.

How is Perpetuuti's Accounting iBoT Unique in the Market?

Manual tasks and information silos that slow responsiveness won't cut it with today's consumers, who expect a fast and seamless customer experience. By smartly automating manual tasks at a fraction of the human equivalent, Accounting iBoT can deliver an immediate cost saving of 60-80% and free up your knowledge workers for more value-added tasks.

AI-powered Automation Solution

Multi-fold Benefits Delivered to Your Accounting Processes with Perpetuuti's Accounting iBoT

Enhanced Service Levels

Increase staff productivity, service levels and capacity by 35-50%

Cost-Effective

Create an immediate 60-80% cost savings by automating tasks at a fraction of the human equivalent

Increased Efficiency

Slash processing times by up to 90% (30-50% for an average process)

Ease of Use

Does not require an IT Subject Matter Expert to operate

Exception Management

Accounting iBoT enables 100% exception management and eradicates operational errors.

Non-intrusive

Does not change the underlying logic or business rule – ensures data goes through the same rules for verification and consistency with the applications' business rules and logic

Prerequisites/ Inputs

- ⇒ Testing data to build the model such as all the billing documents, invoices and other data on which business rules are to be applied.
- ⇒ SAP Credentials.
- ⇒ Other mandatory fields.
- ⇒ Hardware and Software requirements – Sales iBoT, Server and Av3ar Control Room as per the Av3ar prerequisite

Implementation

- ⇒ Download and Install the Accounting iBoT, Server, and Av3ar Control Room in your environment (Read the Av3ar Installation guide).
- ⇒ Configure the Server and Bot Details
- ⇒ Map the workflow to the Job
- ⇒ Trigger the Job.
- ⇒ That's it - Now the bot is ready to get going.
