

Is Your Accounts Payable Department Running at Peak Performance?

Streamline Your AP Process with Accounts Payable iBoT from Perpetuuiti's Plug-and-Play iBoT Store

Standardize Processes. Reduce Processing Times.

What does the Accounts Payable iBoT do?

The smart AP iBoT automates recurring tasks like invoice processing, reconciliation, and processing payments against those invoices. Designed for easy deployment, the Accounts Payable iBoT is focused on reducing time and errors in accounts payable organization. It identifies invoices from various sources and in different formats and extracts information. It then populates the data into a structured format. The iBoT then uses this information and applies business rules for reconciliation. The AP iBoT also enables automated payments after it validates the invoice process.

How is Perpetuuti's Accounts Payable iBoT Unique in the Market?

Perpetuuti's Accounts Payable iBoT provides reusable components that AP teams can quickly configure, without IT support, to automate their unique invoice-handling process. Our AP iBoT uses historical and real-time human work to learn and get trained. It automatically flags missing or unreadable information as exceptions and routes tasks to the right people. Each manual intervention improves the completeness and confidence of the AP iBoT, which makes it smarter and more accurate.

Use of ML Algorithms to Flag Missing Information, etc. as Exceptions

Right-sized and Scalable Automation Solution

AI-driven Reusable Automation

Unparalleled Security with End-to-End Encryption

Easy Integration with Existing Systems to Get Going in Days

Ease of Use & Configuration Without Technical Support
